

NHLBI Dynamic Registry Data Analysis Request and Outline

Overview: This form is used to request statistical analyses of data from the NHLBI Dynamic Registry. The form serves 2 purposes: (1) to help investigators organize and define the specific analysis being requested (i.e. the hypotheses to be tested); and (2) to provide the Steering Committee with a standardized protocol for judging and prioritizing proposed analyses. The form is intentionally brief, so as to not impose undue burden on the requesting Investigator, and to facilitate rapid review by the Steering Committee.

Please send the completed request electronically to Faith Selzer (selzer@edc.pitt.edu) at the University of Pittsburgh Coordinating Center.

Date of Request:

Working Title:

Investigator(s):
Email/Phone Number

Background:

**Research Hypothesis
(Primary Question(s)):**

Primary Outcome:
Variable(s) – specify
follow-up time:

**Primary Explanatory
(Predictor) Variable(s):**

**Additional comments
(if any):**

Data Source:

No Yes

		Wave 1 (07/97 – 02/98) Follow-up data: one year
		Wave 2 (02/99 – 06/99) Follow-up data: five years
		Wave 3 (10/01 – 03/02) Follow-up data: one year on all & five years on brachytherapy patients
		Wave 4 (2/04 – 5/04) Follow-up data: three years
		Wave 5 (2/06 – 8/06) Follow-up data: one year

Disposition of Request (to be completed by the Steering Committee):

Date of Disposition:

Decision: Approve Do not approve

If approved: priority Very High High Medium

If not approved: reason Inadequate scientific rationale

Inappropriate design / formulation of hypothesis

Registry data not suitable for proposed analysis

Overlap with ongoing / prior analysis
